**Instructions:**

- Assignment type: Individual
- Assignment contains three questions and will ask you to get familiar with aspects of Apache Spark. While the first two questions require you to get familiar with Spark programming, the last question will ask you to understand an existing code and explain it in simple terms.
- Submission documents:
- (A word/PDF document with results/screenshots of results, along with the code files to be uploaded on LMS)
- All the datasets and necessary files are attached to the assignment folder.
- The coding scheme for individual assignment is 3N-b.
- A Late submission penalty will be applied as mentioned in the course description.
